EQUINE LIGHTING EXPERT

LED lighting solutions
dedicated to the equine sector

OUR PROJECTS PORTFOLIO

“

The facilities are fantastic providing the perfect conditions for good result! The stabling, the indoor and outdoor rings, the people, all together, create a very agreeable environment. I cannot wait to come back! I love it here! I love Normandy!

It is horse country where people love their horses. It is truly one of my favourite places in the world.

”

Steve GUERDAT 

CSO Olympic Champion (London 2012)
and World Cup Champion (2015-2016-2019)

N°1 World ranked rider (since January 2019)

Centre - Saint-Lô - November 2, 2020

PARIS 2024 OLYMPIC & PARALYMPIC GAMES

78 - VERSAILLES (FRANCE)

Project: These mobile lighting devices adopted and used as a **world first by veterinary teams and night stewards.**

Present at the clinic from 10 p.m. to 6 a.m., the night veterinarians made rounds with the FEI night stewards to monitor the **well-being of the horses** and intervene if necessary.

Equipped with **flashlights, portable projectors incorporating Proximal red light**, light not perceived by horses, to respect their tranquillity and sleep.

Palace of Versailles: an exceptional historic site to host all the horse riding events!

JUMP'EST

ROSIÈRES-AUX-SALINES (FRANCE)

Project: For Jump'Est 2023, PROXIMAL and HEALF (PROXIMAL partner-distributor) installed PROXI-PERFORM luminaires in 3 control boxes. The solution **PROXI-PERFORM** makes it possible to light the stall-boxes, if necessary, white light (stimulating) or red light (soothing). **The goal? Facilitate relaxation and allow better recovery of the horses essential to performance.**

PÔLE HIPPIQUE - NATIONAL STUD

50 - SAINT-LÔ (FRANCE)

Project: The International Equestrian Competitive Centre of Saint-Lô originates from its former status as one of France's prestigious National Studs. Today, their **top-quality facilities** include an **exceptionally large indoor arena (75 m x 35 m)** known as the "Hall du Pôle". **Horse welfare, comfort and reducing energy costs** are aspects that reinforce Saint Lô's strategy to continue improving their facilities and includes the renovation of their indoor arena lighting with PROXIMAL's LED equine lighting with **level 5* competition standards set by the French Equestrian Federation.**

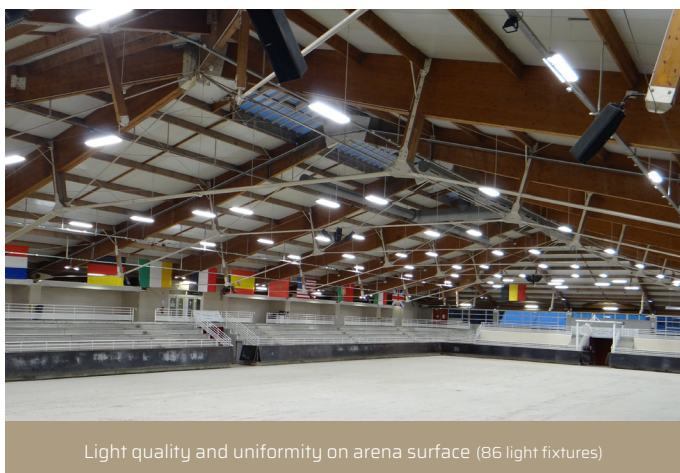

ACTIVITY: Sport - Training - Tourism - Events

INSTALLER: A.T.E.E Joubin Electricité (Coutances - France)

Light quality and uniformity on arena surface (86 light fixtures)

Optimal conditions for performance (Grand Prix CSI 4* 2020)

Top quality facility - Equestrian centre for Paris Olympics 2024 training

“

I am extremely satisfied with the rendering and perfect uniformity of the lighting on soil without any drop shadow.

This is one of the most important points to consider for the equine environment and more generally for the practice and teaching of horse riding.

”

Olivier DUPILLE

Manager & Riding instructor
of the Equestrian Center of Magnanville

Écuries de Magnanville (France)

LÉAUPARTIE STUD

14 - LÉAUPARTIE (FRANCE)

Project: At the end of 2022, professional riders Clément Boulanger and Julia Ségalot took over Haras de Léaupartie in Normandy. Over two years of dedicated work, they transformed the estate into a high-performance training center, fully tailored to their sporting ambitions.

This facility, set up in a 'training-only' configuration, offers **perfect lighting uniformity on the ground and outstanding visual comfort** for working with horses. The lighting truly enhances the beauty of this stunning arena!

ACTIVITY: Sport horses stable & Trade

RACING STABLE J.C. - G BEAUFILS

61 - MAGNY-LE-DÉSERT (FRANCE)

Project: At the head of around 35 horses, **Guillaume Beaufils (Trainer)**, based in Magny-le-Désert to the northwest of Alençon, works hand in hand with his brother **Jean-Charles (Driver)**. Together, they demonstrate the benefits of the solution implemented in the stable.

"We always set our starters under **the red light the day before and the evening of the races**. This gives them a **stress-relieving** side. They rest much better. They sleep lying down. And we see that **the horses recover better from their race as well**. Even when they get out of the truck to enter the box, with the red light, they are **much more relaxed**. Generally, it calms them down and brings a reassuring, cool side".

Project: Stable dedicated to the **well-being and optimization of the recovery** of athletic horses, contributing to the improvement of their health and performance. Gerald Bauernfeind, expert in equine photobiomodulation (light therapy), is interested in and adopts the best technologies and innovative methods in order to optimize the body and mind of horses.

Usage of **PROXIMAL luminaires**, combining functional white light and light with a **specific red wavelength**, improves efficiently **recovery and the night rest essential for performance**.

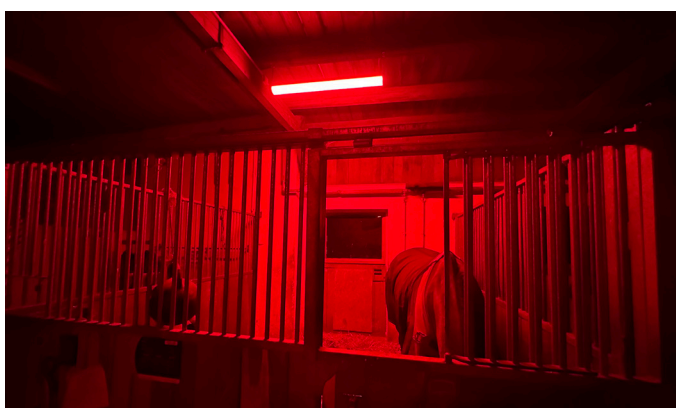

ACTIVITY: Equine health and research centre

DATE: 10/2022

PROXIMAL OFFER: PROXI-PERFORM ; PROXI-BOX-C

PROJECT MANAGER - INSTALLER: Equusave

(Gerald Bauernfeind)

Optimizes sleep and improves recovery.

Partnership in PROXIMAL's "Well-being & Performance" program.

EQUUSAVE adopts the best technologies and applies revolutionary methods to optimize the body and mind of horses.

SEMILLY STUD

50 - COUVAINS (FRANCE)

Project: Based on the labour, the experience and the know-how of horsemen from generation to generation, Semilly stud farm has grown up in Couvains for more than 30 years. The new show-jumping stable, fully lit by PROXIMAL and inaugurated in 2021, is the result of all those years of work. The stables (59 boxes, preparation areas, showers and solarium) benefit from an **innovative PROXIMAL lighting solution controlled by the level of natural lighting** which saves 40 to 60% of electricity consumption compared to an installation Classic LEDs.

ACTIVITY: Breeding - Horse valorisation
Show-jumping stable

DATE: 07/2021

PROXIMAL OFFER: PROXI-BARN-T

PROJECT MANAGERS: Semilly stud

(Anne-Sophie & Richard Levallois - Semilly Horses)

MAIN CONTRACTING: EURL Xavier Giraudon (Glanville - France)

CONSTRUCTOR: CPL Bois (Fervaches - France)

Optimal conditions for horse/human well-being and shared visual contact.

Lighting of the luminaires controlled by the level of natural lighting.

New show-jumping stable for Semilly stud: Top-level infrastructure!

HSMG ÉQUITATION

74 - AVIERNOZ (FRANCE)

Project: HSMG ÉQUITATION is a private show jumping stable located in Haute-Savoie, near Annecy. **Top caliber equestrian facilities built at the end of 2020 - beginning of 2021.** Tailor-made equine lighting (15 stalls, grooming/shower areas and circulation aisle) particularly well designed **to optimize the management and safety of the horses.**

Artificial lighting provides **horse/human comfort, well-being and shared eye.**

ACTIVITY: Private horse jumping stable

DATE: 03/2021

PROXIMAL OFFER: PROXI-BARN-T

MAIN CONTRACTING: Julien Delétraz Architecte (Villaz - France)

CONSTRUCTOR: LP Charpente (Allonzier-la-Caille - France)

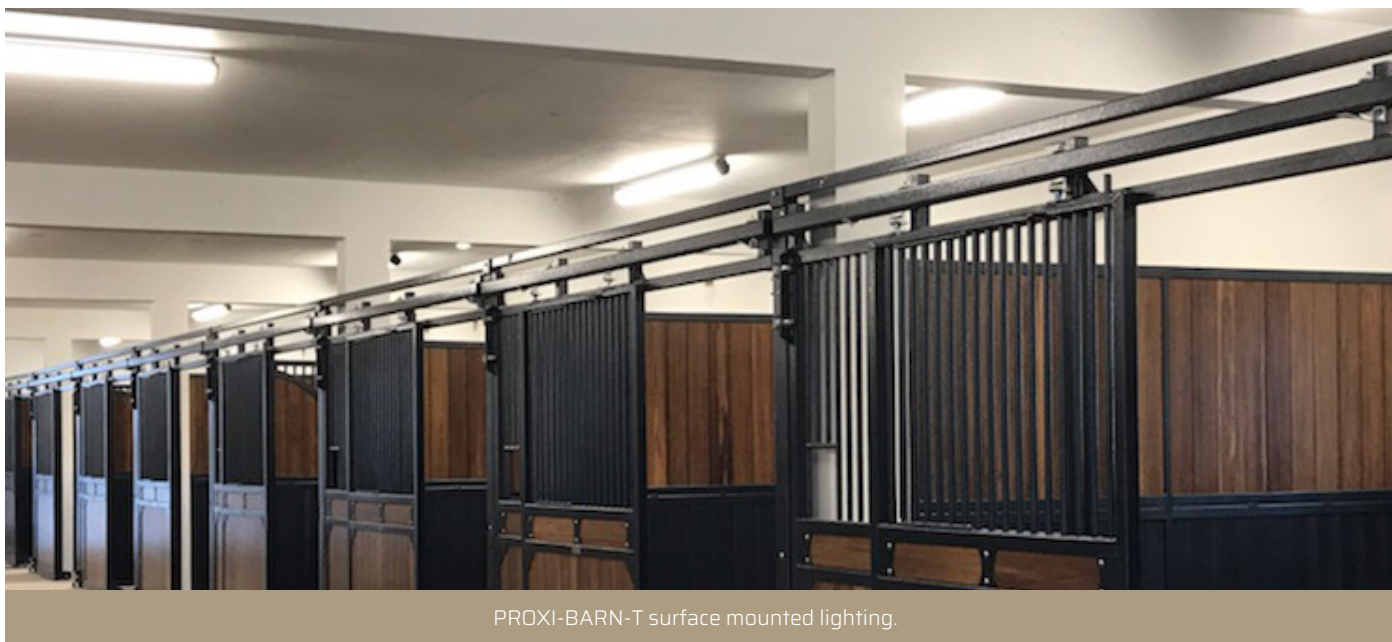

INSTALLER: Duret Services (Villars-les-Dombes - France)

Optimal conditions for horse/human well-being and shared visual contact.

Superb building site (stables and arena) lighted by PROXIMAL.

PROXI-BARN-T surface mounted lighting.

STÉPHANE ANQUETIN STABLES

76 - OCTEVILLE-SUR-MER (FRANCE)

Project: The owners of the **Anquetin Stables and Pony Club** recently moved into their new equestrian facilities at the end of 2020, located in an idyllic setting of Normandy. The newly designed and constructed stables (**40 boxes**) **optimize horse safety and management**. Artificial lighting provides **horse/human comfort, well-being and shared eye co** resulting in **optimal working conditions** for riders, staff and veterinarians **to carefully examine all horse body parts**.

ACTIVITY: Competition and Pony Club services and facilities

DATE: 12/2020

PROXIMAL OFFER: PROXI-BARN-T

CONSTRUCTOR: James Charpente (Brécey - France)

INSTALLER: ELR Electric (Le Grand-Quevilly - France)

PROJECT LEADERS: Stéphane & Camille Anquetin

(Octeville-sur-Mer - France)

Overhead PROXI-BARN-T lighting.

Optimal conditions for horse/human well-being and shared visual contact.

5-star facility located at Octeville-sur-Mer (40 boxes and grooming areas).

LA ROSE DES VENTS EQUESTRIAN FARM

59 - SAINT-JANS-CAPPEL (FRANCE)

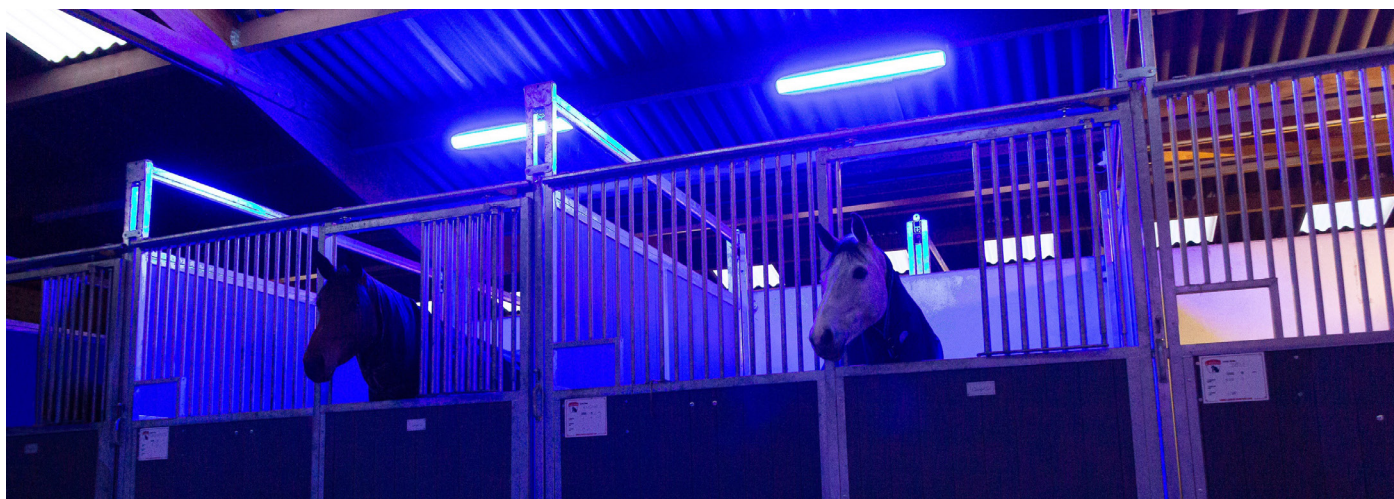

Project: Situated in the heart of Flanders close to Lille and Dunkerque, the equestrian farm the Rose des Vents has been recently renovated. Elie Terrier (Managing owner) selected PROXIMAL to photo stimulate his empty brood mares. PROXIMAL photo stimulation lights help mares to produce a better reproduction cycle early in the breeding season.

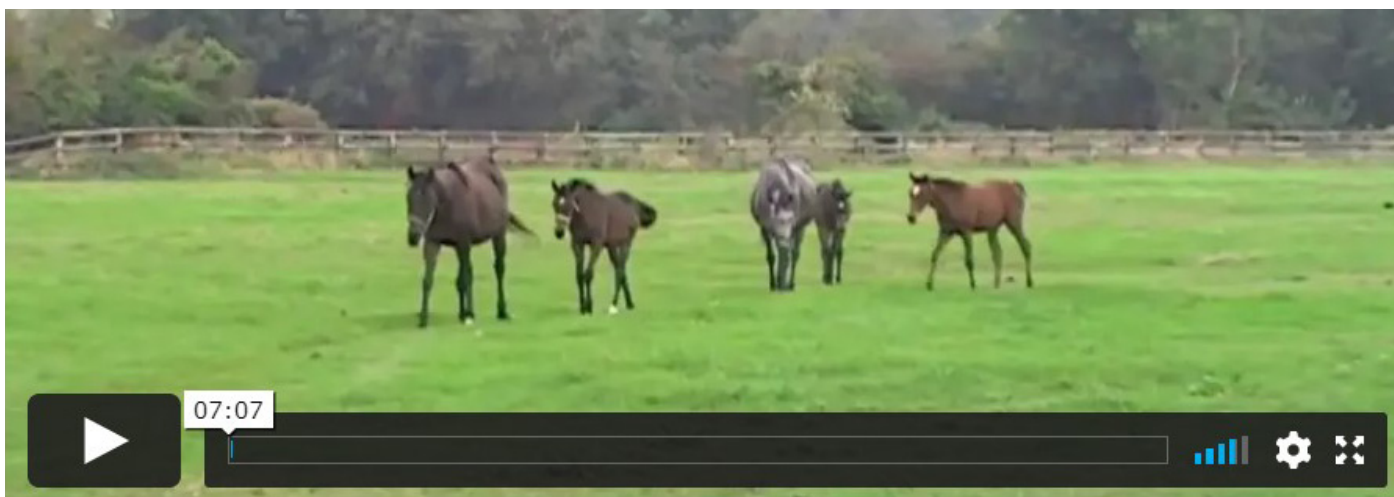

ACTIVITY: Equestrian Center for competition & leisure
DATE: 12/2020

PROXIMAL OFFER: PROXI-BARN-T (PHOTO STIMULATION)

PROJECT MANAGER & INSTALLER: GAEC Rose des Vents

Empty brood mares' stalls with photo stimulation lights.

Benefits of photo stimulation: <http://proximal-lighting.com/landingv10-en/>

LA ROSE DES VENTS EQUESTRIAN FARM

59 - SAINT-JANS-CAPPEL (FRANCE)

Project: Situated in the **heart of Flanders** close to Lille and Dunkerque, the **equestrian farm the Rose des Vents** has been recently renovated.

A new **40-stall barn** has been built to **improve security and better manage daily operations**. The artificial light installed provides **well-being for the horses** and an optimal environment for riders, barn personnel, veterinarians and blacksmith **to care and examen horses**.

ACTIVITY: Equestrian Center for competition & leisure

DATE: 11/2020

PROXIMAL OFFER: PROXI-BARN-T

PROJECT MANAGER & INSTALLER: GAEC Rose des Vents

Optimal environment for a horse's well-being and care.

Provides excellent perspective for observing all horse body parts.

Equally distributed light throughout the barn's alleys, stalls and care areas.

KINÉSIA

(CIRALE - FRENCH NATIONAL VETERINARIAN SCHOOL- ALFORT)

14 - GOUSTRANVILLE (FRANCE)

Context : The Kinésia Centre is a unique facility **dedicated to equine physiotherapy and rehabilitation**. Their aim is to research the best methods for equine rehabilitation and to offer their horse patient a complete and **innovative platform for rehabilitation**. The horse stalls are equipped with PROXIMAL intelligent LED lights capable of **monitoring a horse's health and well-being** in different lighting conditions.

EQUINE RESEARCH

RACING HORSES

JUMPING

Intelligent LED Lighting PROXI-BOX-C for each horse stall.

Most equine research has been done during horses' sporting activities and little has been completed from horses' daily lives in their stalls. **We lack data on horses' reactions to different light conditions** and any study on this subject, is interesting. PROXIMAL offers the best way to address this issue.

Prof. Fabrice AUDIGIÉ
Director CIRALE, Pr. E.N.V.A

Barn Zone: lighting in hallways and horse stalls.

PASCAL LEBAS STABLES

14 - BREUIL-EN-AUGE (FRANCE)

Project: La The aim of the infrastructure is to receive professional riders in sport horses.

The lighting of the stables has been designed to provide **well-being, comfort and eye contact for the horses.** It also allows riders and veterinarians to **carefully examine all parts of the horses' bodies.**
